

5 Top Tools

For Successful Webinars

Success online starts with creating great content, getting it out to the right people on the right platforms, being engaging and active, all without it becoming a major time suck. These tools (and I) can help!

1

Mic/Sound

The sound of your voice is very important in the success of your webinar. Start out on the right foot with the right mic. Noise cancelling Blue Yeti or headset

2

Connect

Constant contact, Convertkit, can be your best friends in terms of list management, communication and analyses. Either of these tools will drive interest & money.

3

Web Camera

If you're going to be doing google hangouts, then a laptop camera is necessary. It's not needed out of the gate but will help in the long run. Use your phone for Periscope.

4

Promote

Leadpages is a powerful tool for driving conversions, staying in front of your customers, and acquiring new customers. It makes you look professional online without an IT guy.

5

Delivery

Goto Webinar, google hangouts, Webinar Jam are some of the great tools for your webinars. You can start for free, and grow into a package and a tool.
